ANN MARIE HOFBAUER, DMD
 PERIODONTICS & IMPLANTOLOGY

HERE FOR YOU

Health, Function, Aesthetics. This is the heart of our practice. Our first and foremost goal is to give you xxxxxxxxxxxxxxxxx. We're skilled in helping patients get beyond their xxxx and be able to relax and be assured they'll have the best of compassionate, professional dental care. We're proud to be at the forefront of dental technology and expertise. Dr. Hofbauer's advanced surgical technique and tools like the **Versah** drill, allow us to offer exceptional care.

"Exceptional skills, advanced technical knowledge and a superb staff; Dr. Hofbauer has created a caring and comfortable setting to improve and restore ones' dental health, thanks for saving mine!!" - Michael F.

DR. HOFBAUER

Dr. Ann Marie "Marnie" Hofbauer grew up in the small Midwestern community of Trenton, Illinois. She received her Bachelor of Science degree in biology from the University of Illinois Urbana-Champaign in 1990. While there, she was active in Alpha Chi Omega. Her Doctor of Dental Medicine was completed in 1994 at Southern Illinois University School of [Read More...](#)

"Dr. Hofbauer and staff are wonderful. They've been gentle and aware of my needs throughout my procedures."
- Kristy K.

TEAM

...

...

Dormilee M. Kiger

A McMinnville native, Dormi brings a genuine warmth to her 8+ years working with Dr. Hofbauer as a dental assistant. The highlight of Dormi's job is connecting with her patients. Wife, mother and holiday decorator extraordinaire, Dormi's energy is infectious.

"Dr Hofbauer is definitely on the cutting edge in terms of new techniques and procedures to help keep a healthy smile." - Buddy B.

PROCEDURES

We want you to understand your procedure. With this understanding you can become more comfortable. In addition to thoroughly discussing your procedure with you, the links below may be helpful in giving you a visual understanding. Select a before and after link in the list below to see specific procedure details.

We're proud to offer extensive experience and leading-edge technology to all of our procedures.

In our continued commitment to provide you with quality dental care and to offer affordable services, we are asking that you pay in full at the time of treatment. If you have dental insurance we will be happy to assist you in billing them and the payment will go directly to you. We offer a 5% courtesy discount if pre-paid in full.

When appointments are scheduled, we have reserved that time for you. If for any reason you need to reschedule with less than 24 hours notice, we will ask for a \$50.00 reservation fee to hold your rescheduled appointment.

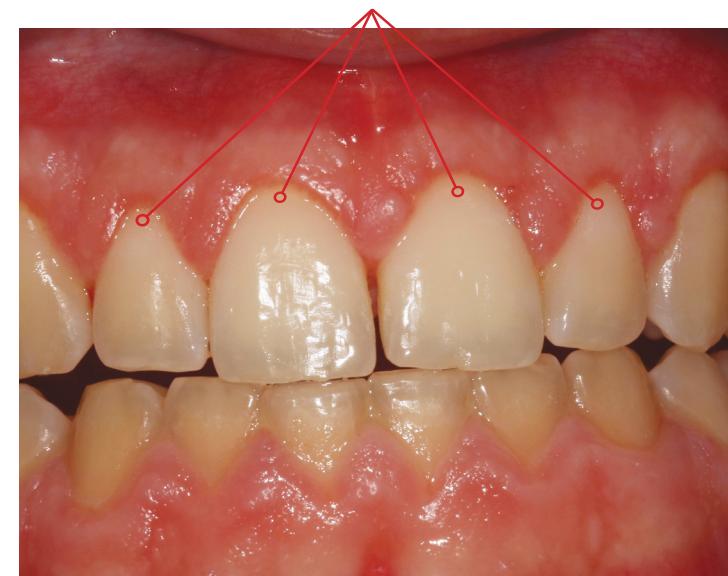

"I've had 2 implants and some graft work done several years ago with no issues whatsoever. I highly recommend Dr Hofbaeur and her team, for they are truly 'masters of their craft'." - Alex V.

Gum tissue covering the teeth

Crowns of the teeth lengthened

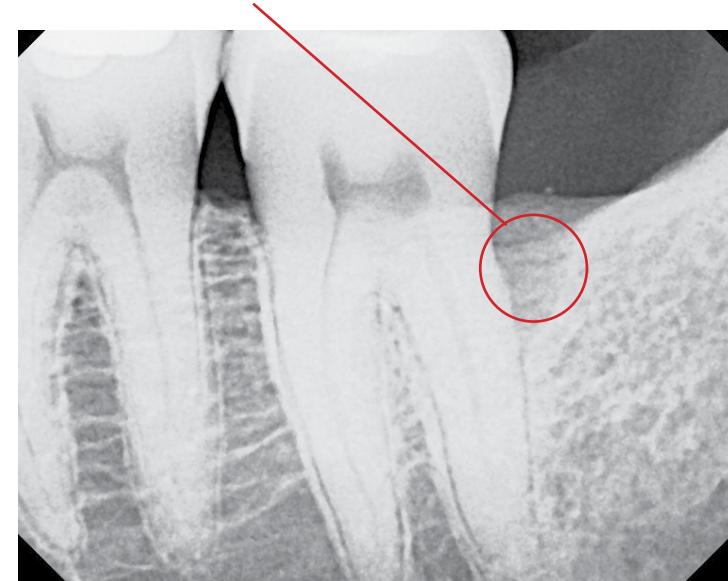

X

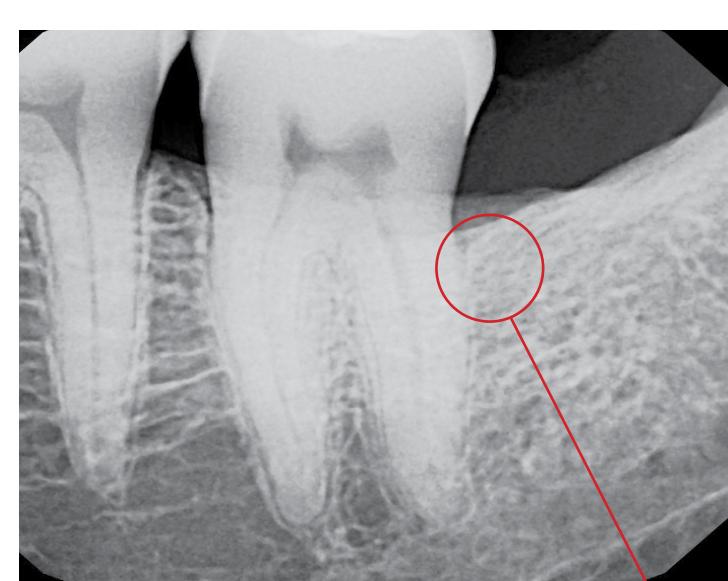

Crown Lengthening This can be used to change a “gummy smile”. Sometimes a person has too much bone and gum tissue hiding much of the tooth. I can reshape and enhance this appearance.

There are times when your dentist does not have enough solid tooth structure to grab onto for a crown. Crown lengthening exposes more of the tooth for a healthy restoration.

Missing bone

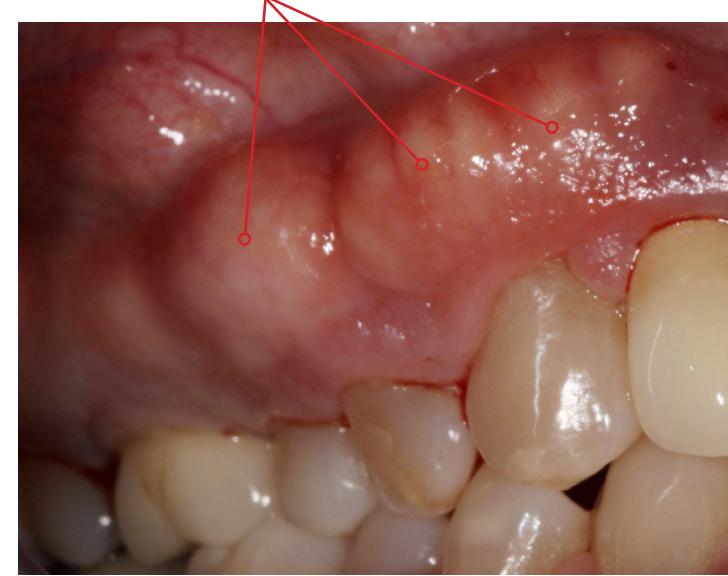

X

Regrown bone

Bone Grafting With periodontal disease, bone around teeth is damaged. Often we can repair and regrow this bone. We use state of the art materials and techniques to accomplish this.

Bone to be reduced

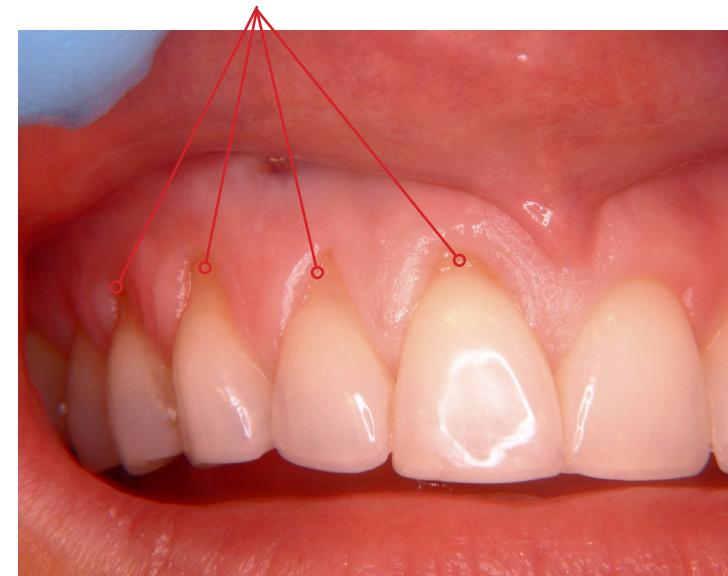

X

>

Osseous Surgery This refers to a number of procedures aimed at gaining access to the tooth roots to remove tartar and disease-causing bacteria. The goal is to change the environment so as to be less bacteria friendly and allowing you, the patient and your hygienist better ability to clean.

Root exposure

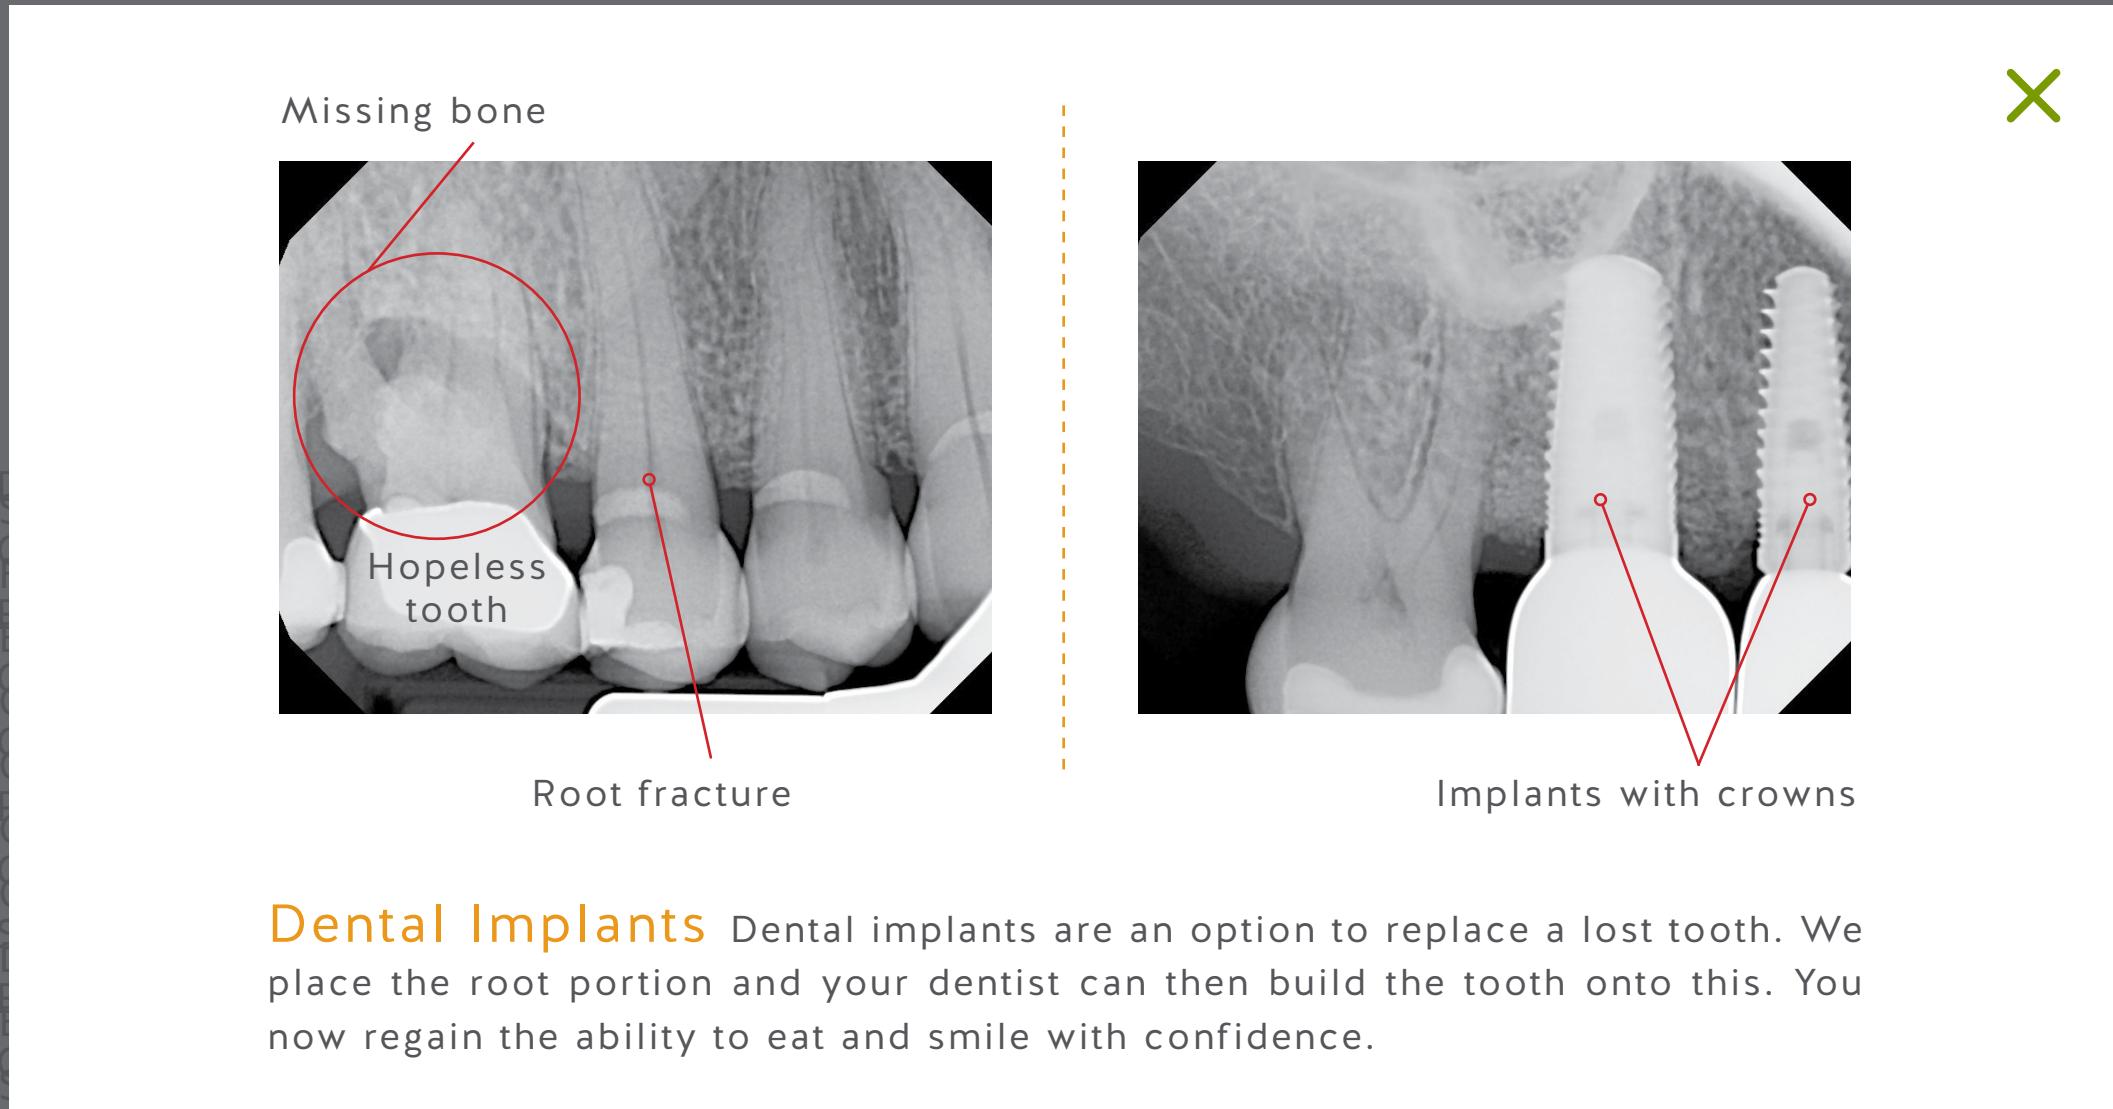

X

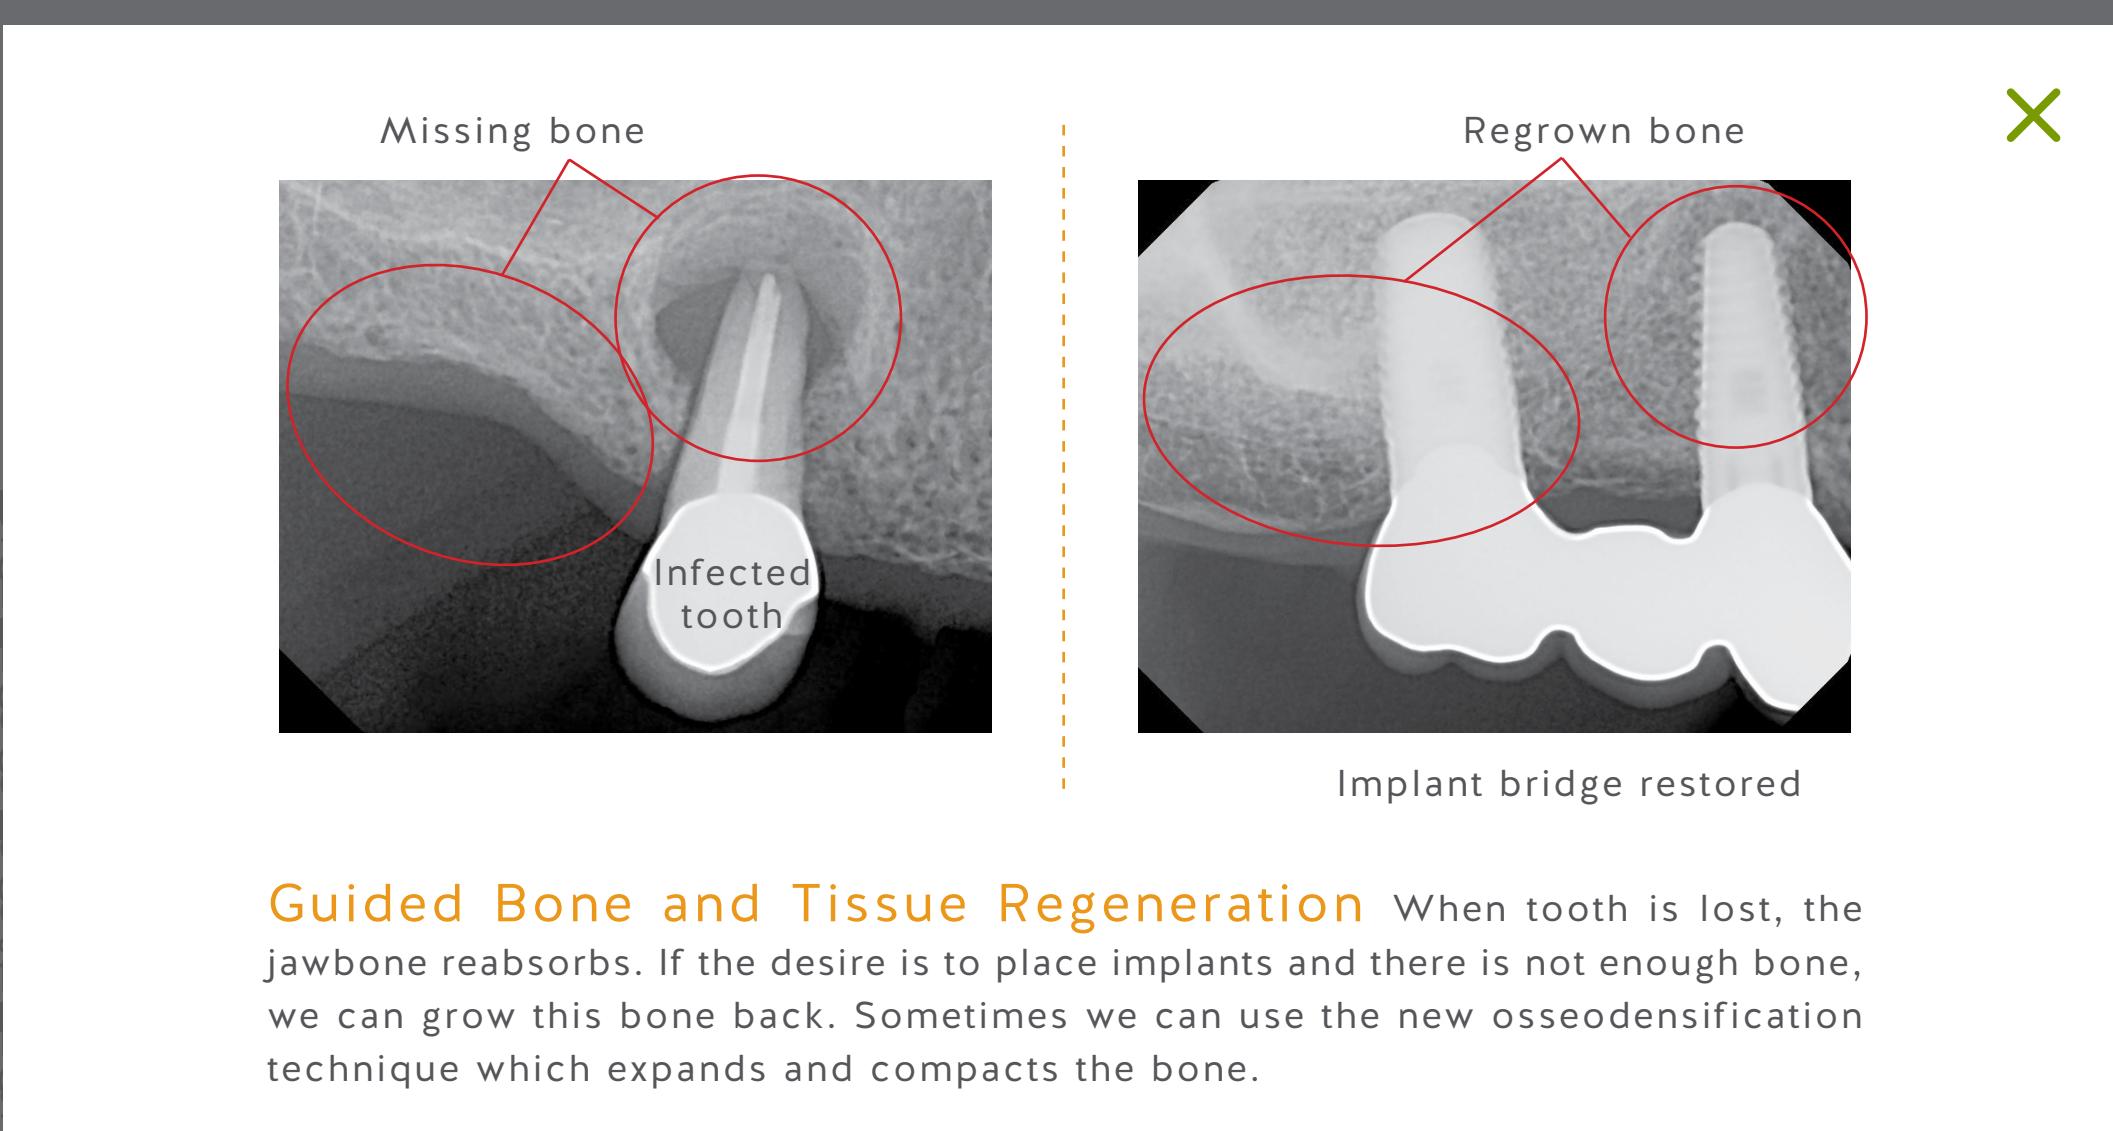

>

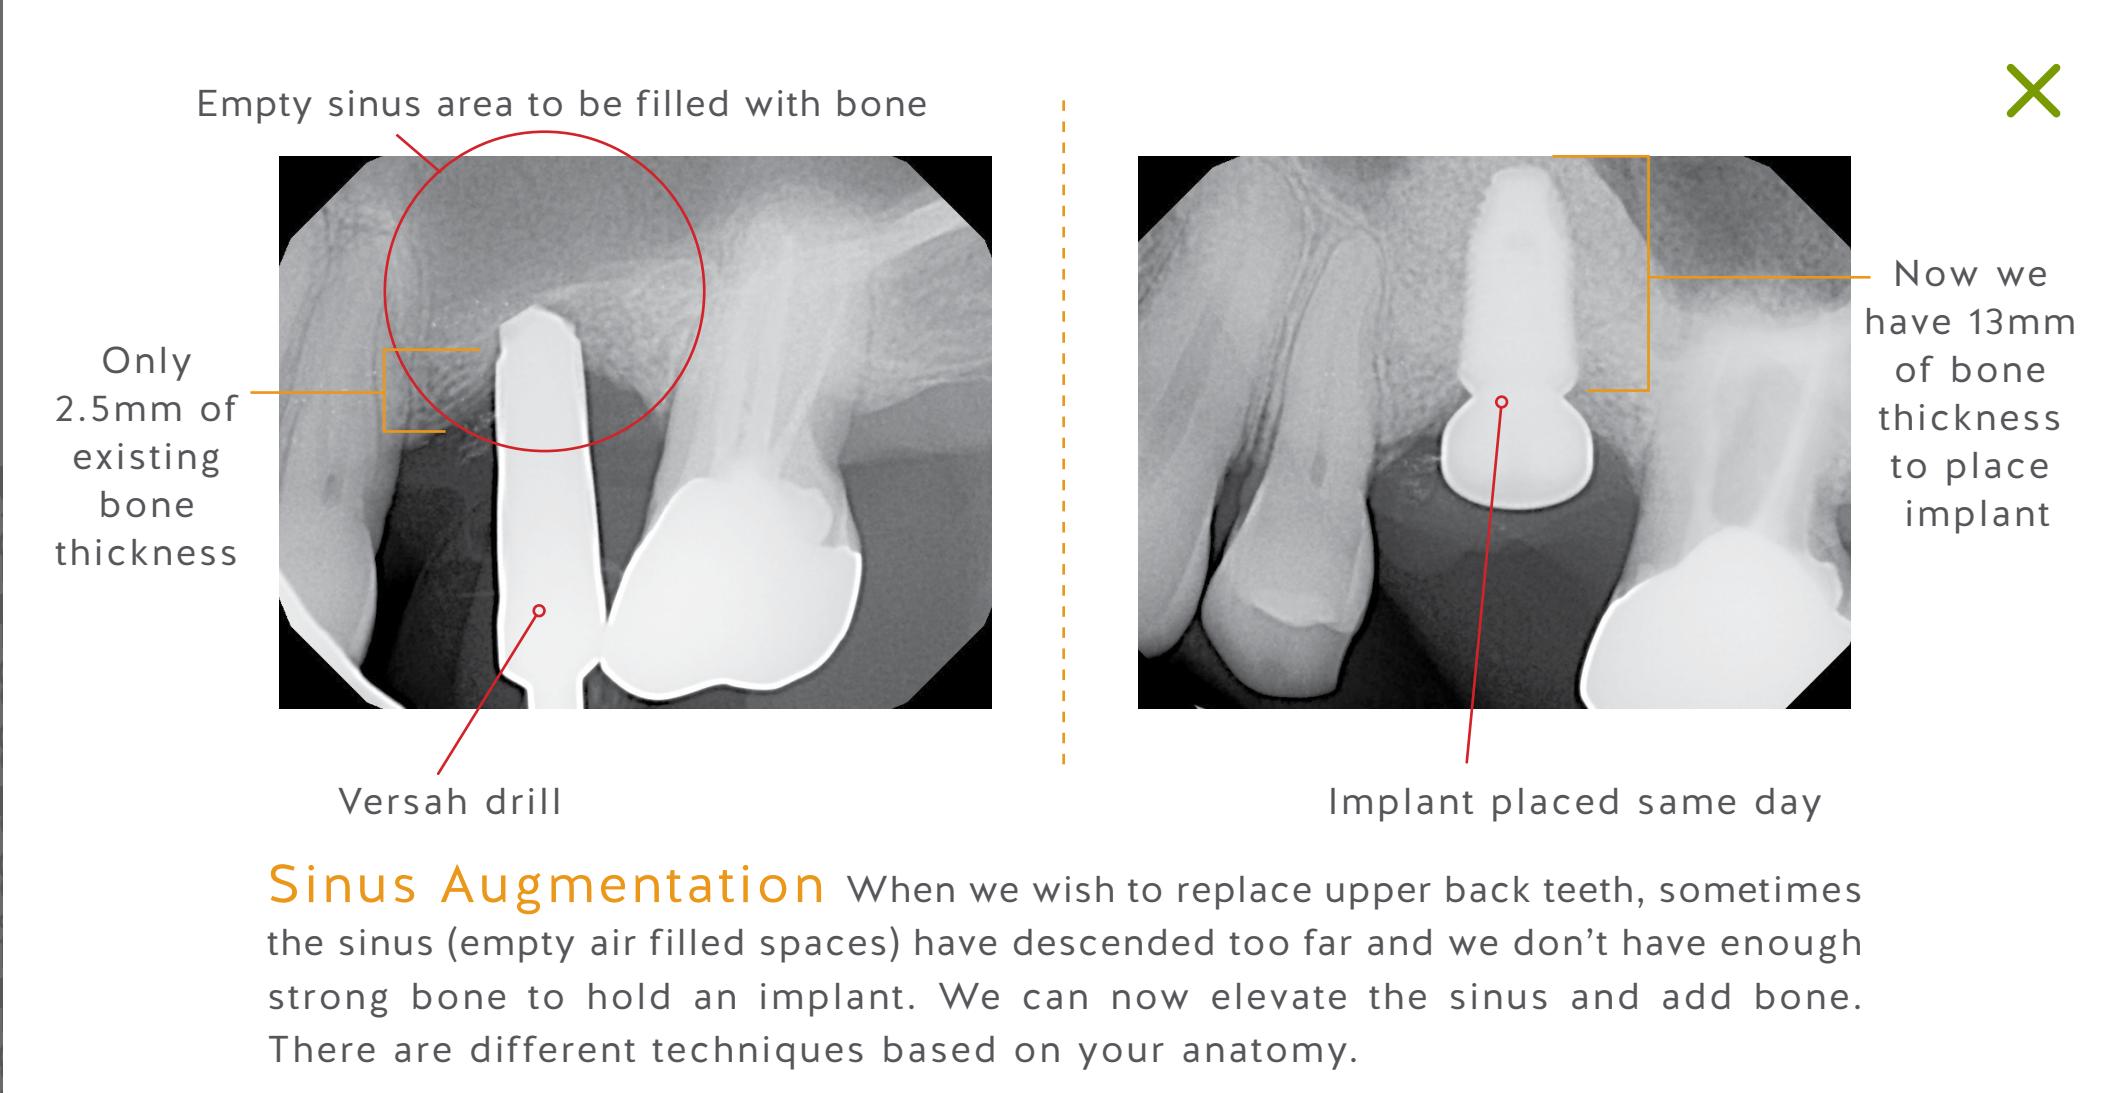

Gum Grafting When the gums move up or recede, the body loses a natural defense against both bacterial penetration and trauma. To restore this and prevent further gum and bone loss we can rebuild this lost tissue.

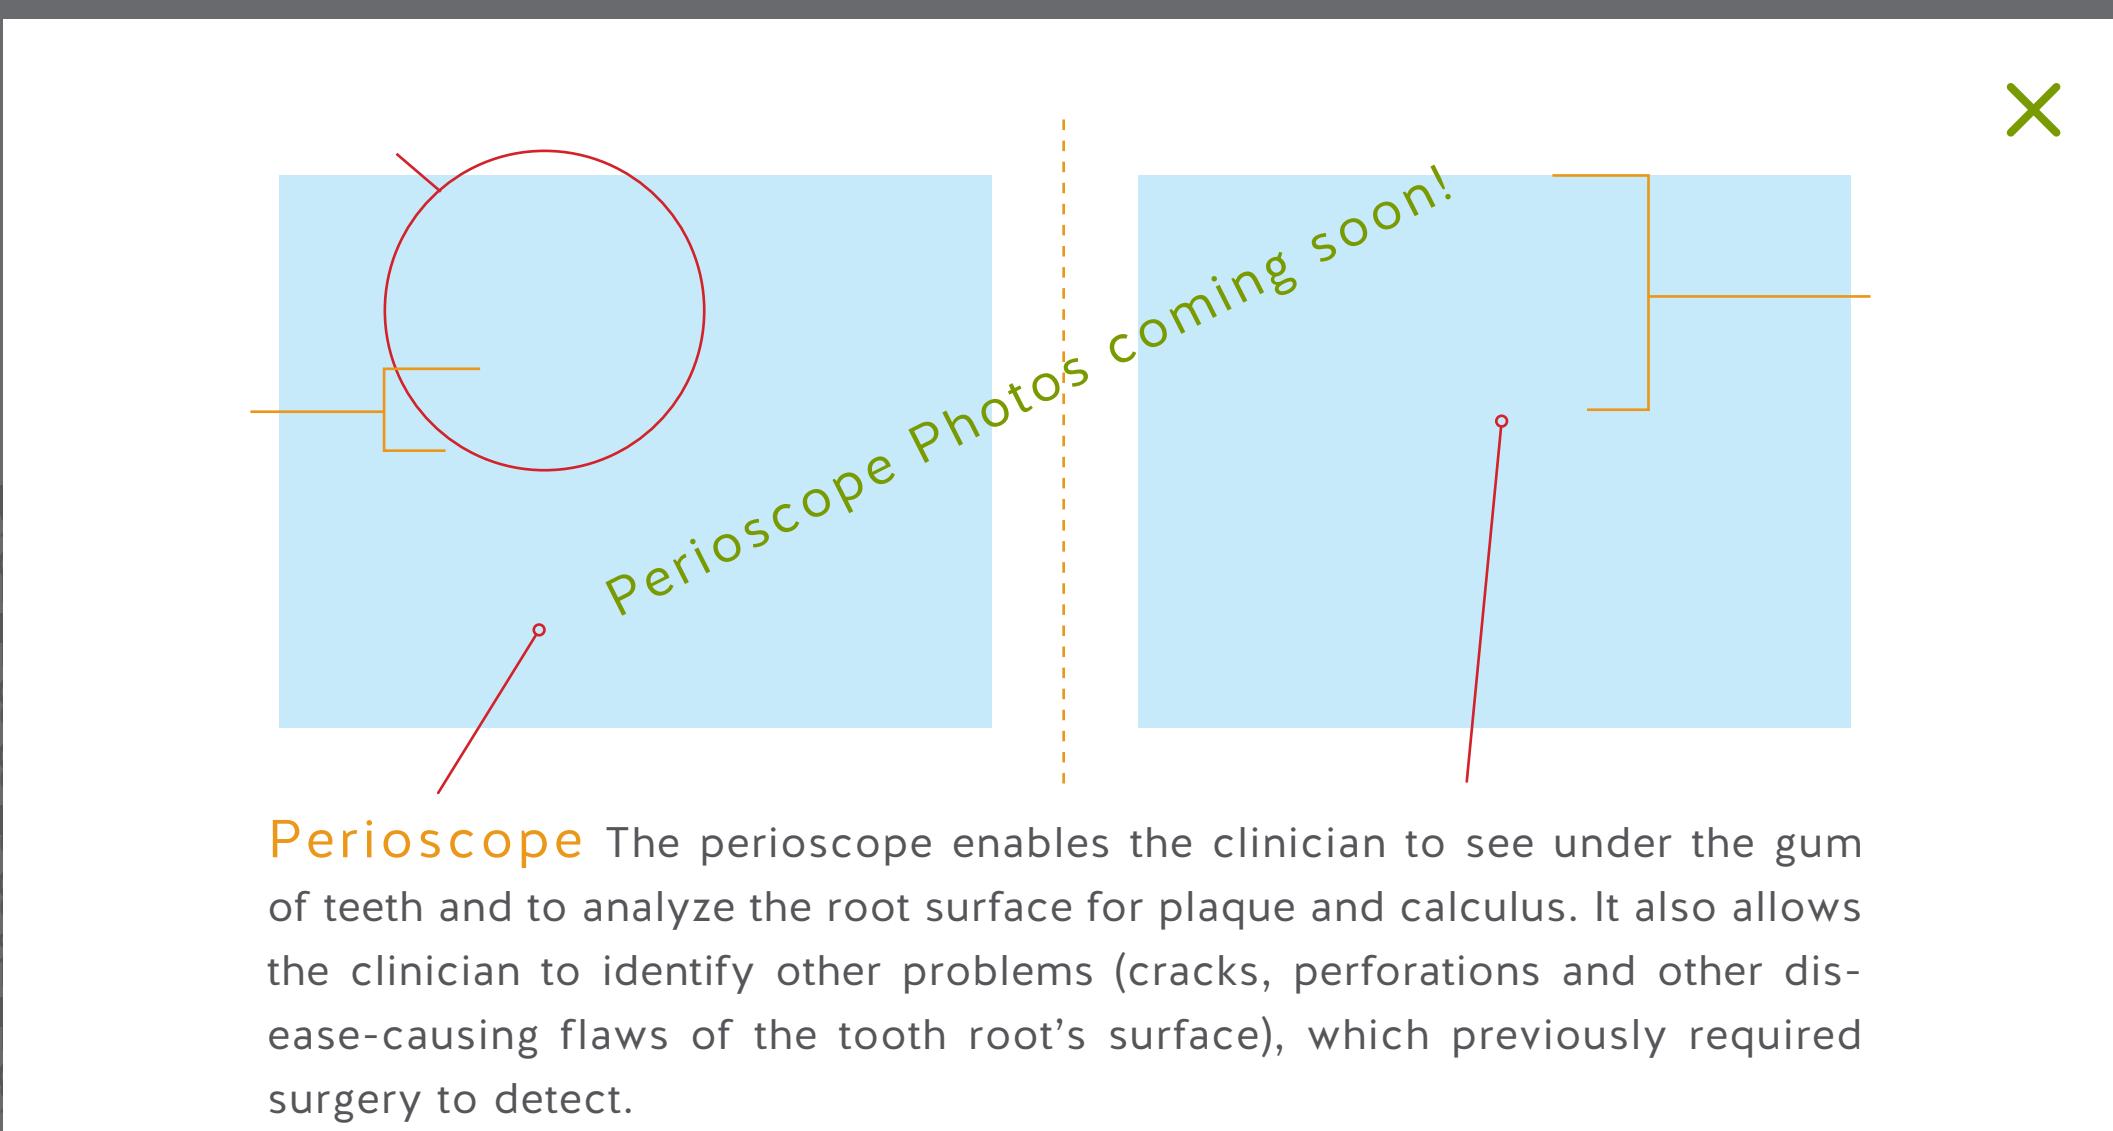

Dental Implants Dental implants are an option to replace a lost tooth. We place the root portion and your dentist can then build the tooth onto this. You now regain the ability to eat and smile with confidence.

Guided Bone and Tissue Regeneration When tooth is lost, the jawbone reabsorbs. If the desire is to place implants and there is not enough bone, we can grow this bone back. Sometimes we can use the new osseodensification technique which expands and compacts the bone.

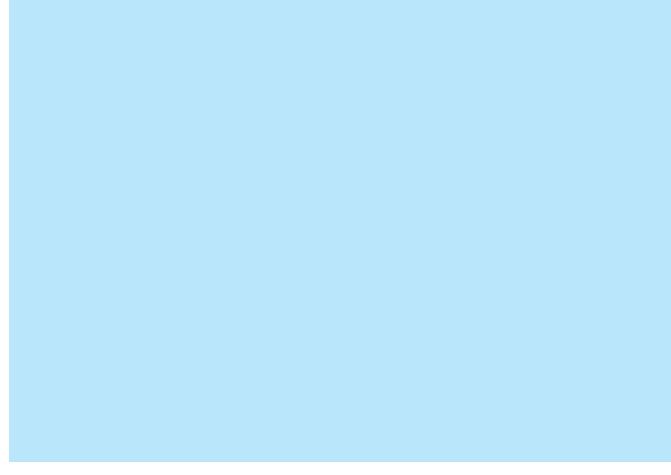

Sinus Augmentation When we wish to replace upper back teeth, sometimes the sinus (empty air filled spaces) have descended too far and we don't have enough strong bone to hold an implant. We can now elevate the sinus and add bone. There are different techniques based on your anatomy.

Perioscope The perioscope enables the clinician to see under the gum of teeth and to analyze the root surface for plaque and calculus. It also allows the clinician to identify other problems (cracks, perforations and other disease-causing flaws of the tooth root's surface), which previously required surgery to detect.

"I've had 2 implants and some graft work done several years ago with no issues whatsoever. I highly recommend Dr Hofbaeur and her team, for they are truly 'masters of their craft'." - Alex V.

"I had an implant placed less than two weeks ago - excellent care! Almost painless. Very attentive staff, thoughtful, kind. Dr. Hofbauer is extremely skilled and caring." -Anne F.

TESTIMONIALS

Larry O.

"**Fantastic.** I have never experienced ANY professional/business group of people that have been as **pleasant, accommodating, efficient, and professional** as the group of beautiful ladies at Dr. Ann Hofbauer's periodontal practice. She has assembled a team that is the epitome of the ideal professional entity. I am the biggest coward in the world when it comes to medical procedures and I informed Dr. Hofbauer and her staff of that fact right from the start. They have striven and succeeded in **making me feel comfortable**—both psychologically and physically—with every visit. [Read more...](#)

Donna S.

"I have needed a gum graft for over 10 years and was scared to death to have it done. I finally could wait no longer and my dentist referred me to Dr. Hofbauer. I can honestly say I was **so surprised when I DID NOT FEEL A THING!!!** I didn't go under or have any tranquilizers. I didn't even feel the shots of novocaine. It's been over a month now and **everything is healing and working well.** Dr. Hofbauer and her entire staff are amazing. I really can't say enough good things about them. Also, I was telling a friend [Read more...](#)

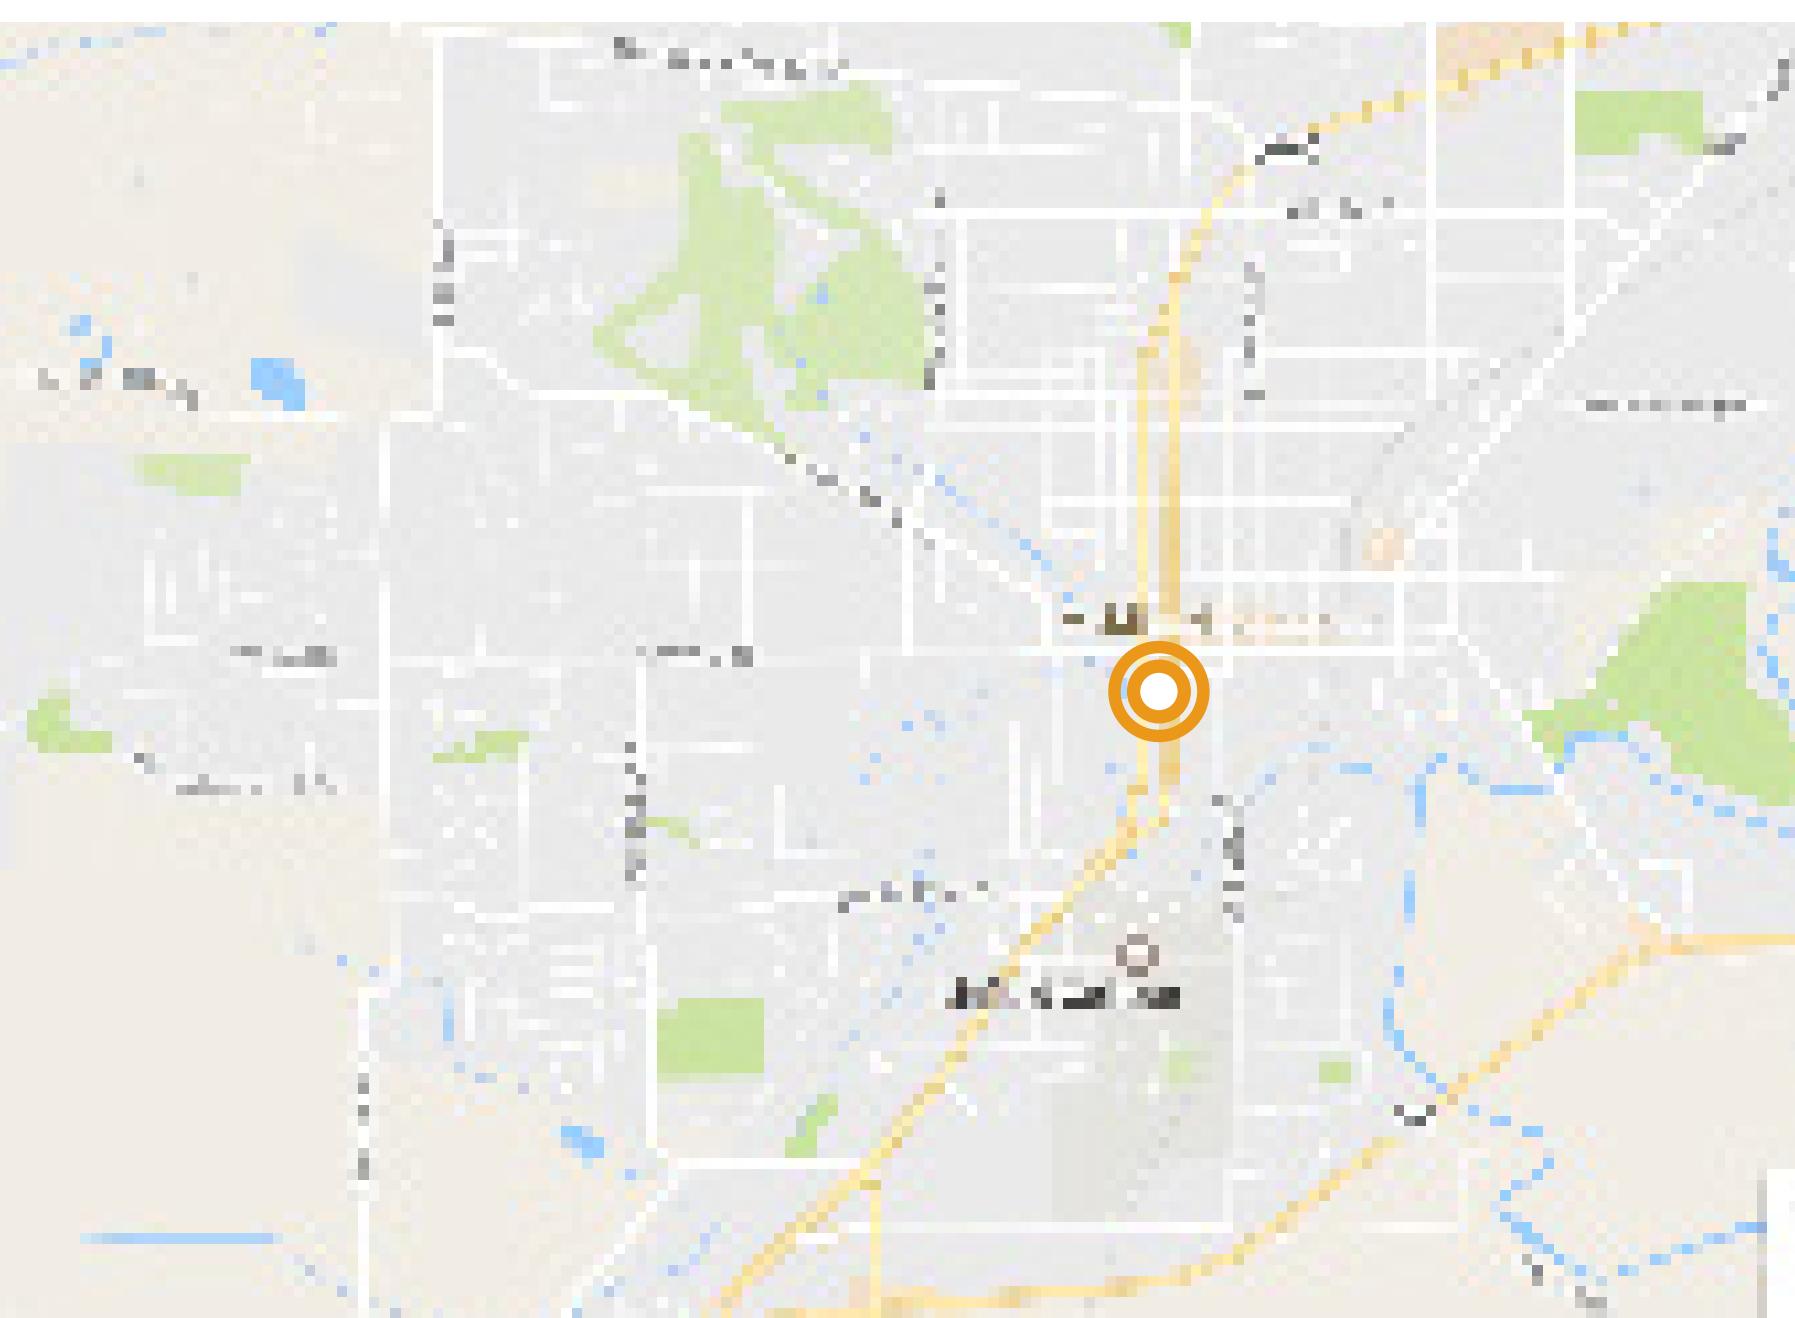

Buddy B.

"Dr Hofbauer and her staff provide the **most professional, caring** experience of any office I have ever visited. They truly care about their patients and it shows in the quality of work they perform. Dr Hofbauer is definitely on the **cutting edge in terms of new techniques and procedures** to help keep a healthy smile. I highly recommend them! [Read more...](#)
